

black hole physics basic pdf

The black hole information paradox is a puzzle resulting from the combination of quantum mechanics and general relativity. Calculations suggest that physical information could permanently disappear in a black hole, allowing many physical states to devolve into the same state. This is controversial because it violates a core precept of modern physics – that in principle the value of a wave ...

Black hole information paradox - Wikipedia

A black hole is a region of spacetime from which nothing escapes. Around a black hole there is a mathematically defined surface called an event horizon that marks the point of no return. It is called "black" because it absorbs all the light that hits the horizon, reflecting nothing, making it almost an ideal black body (radiation with a wavelength equal to or larger than the radius of the hole ...

I'm aiming to encourage people to think carefully about what he is telling them. I'm not out to discourage people from trying out any promising new ideas – what I want is to help people question what's out there for themselves.
