Interactive Computer Graphics with WebGL: Global Edition

Computer graphics are pictures and films created using computers. Usually, the term refers to computer-generated image data created with the help of specialized graphical hardware and software.

Computer graphics - Wikipedia

Mesa, also called Mesa3D and The Mesa 3D Graphics Library, is an open source software implementation of OpenGL, Vulkan, and other graphics specifications. Mesa implements a cross-language, cross-platform, vendor-neutral standard API for translating these specifications to vendor-specific graphics hardware drivers.. Its most important users are two graphics drivers mostly developed and funded ...

This tutorial was originally titled The OpenGL Light Bible which I wrote when I was learning about how the light source and lighting systems work in OpenGL.. It is a relatively old OpenGL Light tutorial but 10 years later even though OpenGL programming has moved on from glBegin, glVertex and glEnd ("Immediate Mode") approach to VBO and GLSL shaders (and now even further to multi-threaded ...
