

corrugated paperboard boxes global pdf

Paperboard is a thick paper-based material. While there is no rigid differentiation between paper and paperboard, paperboard is generally thicker (usually over 0.30 mm, 0.012 in, or 12 points) than paper and has certain superior attributes such as foldability and rigidity. According to ISO standards, paperboard is a paper with a grammage above 250 g/m², but there are exceptions.

Paperboard - Wikipedia

Several types of boxes are used in packaging and storage.. A corrugated box is a shipping container made of corrugated fiberboard. These are most commonly used to transport and warehouse products during distribution, and are rated according to the strength of the material or the capacity of the finished box.

Box - Wikipedia
