Concrete, reinforcement, and formwork are the three primary expenses in cast-in-place concrete floor construction to consider throughout the design process, but especially during the initial planning stages. Of these three, formwork comprises about 55 percent of the total cost and has the greatest influence on the overall cost of the floor system.

**Reinforced Concrete Analysis and Design**

Reinforced concrete is widely used in building industry. Hence, graduates of every civil engineering programme must have basic understanding of the fundamentals of reinforced concrete. This book aims to provide fundamental understanding to the analysis and design of reinforced concrete structures according to ACI 318M-05 Code.
