Electrodynamics is the physics of electromagnetic radiation, and electromagnetism is the physical phenomenon associated with the theory of electrodynamics. Electric and magnetic fields obey the properties of superposition. Thus, a field due to any particular particle or time-varying electric or magnetic field contributes to the fields present in the same space due to other causes.

Structure. The electromagnetic field may be viewed in two distinct ways: a continuous structure or a discrete structure. Continuous structure. Classically, electric and magnetic fields are thought of as being produced by smooth motions of charged objects.
