Started in 1992 by the Dark Tangent, DEFCON is the world's longest running and largest underground hacking conference. Hackers, corporate IT professionals, and three letter government agencies all converge on Las Vegas every summer to absorb cutting edge hacking research from the most brilliant minds in the world and test their skills in contests of hacking might.

DEF CON® 18 Hacking Conference - Speakers

Supervisory control and data acquisition (SCADA) networks contain computers and software that perform critical tasks and provide essential services within critical infrastructure. Theyâ€™re considered by cyber strategists to be the backbone of any country. Critical infrastructure, and in particular ...

Improving SCADA System Security - InfoSec Resources

1. Introduction. Supervisory Control and Data Acquisition (SCADA) systems are used to monitor and control critical national infrastructures such as smart grids, oil and gas, power generation and transmission, manufacturing, and transportation networks.

Assessing and augmenting SCADA cyber - ScienceDirect

Industrial Networking Solutions Security - PLC, SCADA...by Business Industrial Network training author. Industrial network security solutions essential to today's PLC - SCADA security. Industrial networks are considered the best solution for industrial applications and automation systems for its superior benefits like increasing response time, distance covered and higher interoperability.

Industrial Networking Solutions Security - PLC, SCADA

Discovery. Stuxnet, discovered by Sergey Ulasen, initially spread via Microsoft Windows, and targeted Siemens industrial control systems. While it is not the first time that hackers have targeted industrial systems, nor the first publicly known intentional act of cyberwarfare to be implemented, it is the first discovered malware that spies on and subverts industrial systems, and the first to ...

Catalog Description ADVISE: CNIT 106 or 120 or 201C Learn how hackers attack computers and networks, and how to protect Windows and Linux systems.

CNIT 123: Ethical Hacking and Network Defense -- Sam Bowne

Hacking Attack Causes Physical Damage at German Steel Mill. This sort of thing is still very rare, but I fear it will become more common:...hackers had struck an unnamed steel mill in Germany. They did so by manipulating and disrupting control systems to such a degree that a blast furnace could not be properly shut down, resulting in "massive" -- though unspecified -- damage.

Hacking Attack Causes Physical Damage at German Steel Mill

Su autor es Juan Francisco Bolívar, y ha volcado su experiencia en la auditoría de estos sistemas para explicar cómo se auditan sistemas PLCs a través de los diferentes interfaces de acceso, cómo funcionan los protocolos HMI o cuál es la arquitectura de los sistemas SCADA que se implantan en muchas fábricas automatizadas a diferentes niveles.

Un informe técnico en el lado del mal: Infraestructuras

NBN will cause Australia to lead globally in mobile: S&P. A writedown of the NBN and additional government funding is 'imminent', according to an S&P report, while the tight regulation around fixed broadband will likely lead to greater mobile adoption.

Oil and gas might not seem like an industry that hackers would target. But they do—and the cybersecurity risks rise with every new data-based link between rigs, refineries, and headquarters.

Cybersecurity in oil and gas | Deloitte Insights

This joint Technical Alert (TA) is the result of analytic efforts between the Department of Homeland Security (DHS) and the Federal Bureau of Investigation (FBI).

Russian Government Cyber Activity Targeting Energy and

A cyberattack is any type of offensive maneuver that targets computer information systems, infrastructures, computer networks, or personal computer devices. A cyberattack could be employed by nation-states, individuals, groups, society or organizations. A cyberattack may originate from an anonymous source.

Cyberattack - Wikipedia

Remote Hack of a Boeing 757. Last month, the DHS announced that it was able to remotely hack a Boeing 757: "We got the airplane on Sept. 19, 2016. Two days later, I was successful in accomplishing a remote, non-cooperative, penetration," said Robert Hickey, aviation program manager within the Cyber Security Division of the DHS Science and Technology (S&T) Directorate.
