### **Mathematical Methods of Engineering Analysis**

Mathematical analysis is the branch of mathematics dealing with limits and related theories, such as differentiation, integration, measure, infinite series, and analytic functions.. These theories are usually studied in the context of real and complex numbers and functions. Analysis evolved from calculus, which involves the elementary concepts and techniques of analysis.

The Faculty of Engineering and Mathematical Sciences is a world leader in Engineering for Remote Operations (ERO). Geographically, we are at the hub of a vibrant mining and energy sector, and this provides outstanding opportunities for researchers to collaborate with industry and other partners to meet the challenges of ERO.

Mathematics (from Greek μάθημα, máthēma, "knowledge, study, learning") is the study of such topics as quantity, structure, space, and change. It has no generally accepted definition.. Mathematicians seek and use patterns to formulate new conjectures; they resolve the truth or falsity of conjectures by mathematical proof. When mathematical structures are good models of real phenomena ...
