During his early period, Bohm made a number of significant contributions to physics, particularly quantum mechanics and relativity theory. As a postgraduate at Berkeley, he developed a theory of plasmas, discovering the electron phenomenon now known as Bohm diffusion. His first book, Quantum Theory, published in 1951, was well received by Einstein, among others.

A laser is a device that emits light through a process of optical amplification based on the stimulated emission of electromagnetic radiation. The term "laser" originated as an acronym for "light amplification by stimulated emission of radiation". The first laser was built in 1960 by Theodore H. Maiman at Hughes Research Laboratories, based on theoretical work by Charles Hard Townes and Arthur ...

Natural variations are evident in the data, of course. The most prominent cycles over geological time are governed by (among other effects) Milankovitch cycles which are caused by periodic variations in the Earth's orbit. Bizarrely, the CO<sub>2</sub> concentration is at 380 ppm parts per million today. That's ~26% higher than it's been in the last half million years.

Table 2, based on the Army's 77 BCT program, shows the changes in terms of Army battalions. The Army's decision to increase the number of maneuver companies in its modular heavy BCT battalions from three to four makes it necessary to consider the number of combat maneuver companies as well as the number of battalions.
