Minimum and Maximum loads for LED and CFL lamps / i-• xtures Application Note #487 Revision A October 2013 Â@ 1 Technical Support â€” 800.523.9466 Overview Many LutronR products provide minimum and maximum load ratings in Watts (W) and/or Volt Amps (VA). These ratings are based on traditional light sources (incandescent and halogen lamps) and do not apply to LED and CFL loads.

A loading gauge defines the maximum height and width for railway vehicles and their loads to ensure safe passage through bridges, tunnels and other structures. Classification systems vary between different countries and gauges may vary across a network, even if the track gauge remains constant.
