Robotics: Modelling, Planning and Control is a book that comprehensively covers all aspects of robotic fundamentals. It is particularly an excellent text for graduate educators, as it covers the fundamentals of the field with a rigorous formalism that is well blended with the technological aspects of robotics.

Railway modelling (UK, Australia and Ireland) or model railroading (US and Canada) is a hobby in which rail transport systems are modelled at a reduced scale.. The scale models include locomotives, rolling stock, streetcars, tracks, signalling and landscapes including: countryside, roads, bridges, buildings, vehicles, urban landscape, model figures, lights, and features such as rivers, hills ...

Freeform surface modelling is a technique for engineering freeform surfaces with a CAD or CAID system.. The technology has encompassed two main fields. Either creating aesthetic surfaces (class A surfaces) that also perform a function; for example, car bodies and consumer product outer forms, or technical surfaces for components such as gas turbine blades and other fluid dynamic engineering ...

Time Series Modelling 4 is a comprehensive package for linear and nonlinear time series modelling. It is free to private individuals for academic and educational purposes.. Support is not offered, but comments, feedback and bug-reports (also donations) are always welcome. TSM runs under Ox 7, and the 32-bit console version of Ox is also free to students and academics.

Highlights We explore the project benefits of Building Information Modelling (BIM). We analyse 35 construction projects which report on the use of BIM. Cost reduction and control are the most commonly reported benefit. Time savings and enhanced communication are significant positive outcomes. Challenges from using BIM-related software produce negative benefits in some cases.
