When it comes to the professional marketplace, Dial ® is a known and trusted brand that inspires a special sense of comfort and confidence with businesses and consumers alike.. This preference for the Dial ® brand extends to the away-from-home market as well, where the people who work in your facility, check into your hotel and visit your hospital are the same people using Henkel products in ...

This process creates 1,4-dioxane. For example, sodium laurel sulfate, a chemical that is harsh on the skin, is often converted to the less-harsh chemical sodium laureth sulfate (the “æth” denotes ethoxylation).

### **1,4-dioxane - Safe Cosmetics**

NOTE: Some products contain sodium trideceth sulfate or , which are ingredients with "eth" in the middle (refer back to Part 1 of this post). So far, I have not found anything posted about it that strongly convinces me one way or another. If it appears in the ingredient list, the (+) sign will appear next to the total potential toxins.

Cosmetics are substances or products used to enhance or alter the appearance of the face or fragrance and texture of the body. Many cosmetics are designed for use of applying to the face, hair, and body. They are generally mixtures of chemical compounds; some being derived from natural sources (such as coconut oil), and some being synthetics or artificial.
