PROBABILITY AND MATHEMATICAL STATISTICS

Welcome! Random is a website devoted to probability, mathematical statistics, and stochastic processes, and is intended for teachers and students of these subjects. The site consists of an integrated set of components that includes expository text, interactive web apps, data sets, biographical sketches, and an object library.

Mathematical economics is the application of mathematical methods to represent theories and analyze problems in economics. By convention, the applied methods refer to those beyond simple geometry, such as differential and integral calculus, difference and differential equations, matrix algebra, mathematical programming, and other computational methods.

Select any topic from the above list and get all the required help with math formula in detail. It contains a list of basic math formulas commonly used when doing basic math computation. Math formula shows how things work out with the help of some equations like the equation for force or acceleration. Eventually, formulas are used to provide mathematical solution for real world problems.
